www.linkedin.com/in/umaiyal-s

UI/UX designer with a software developer background, specializing in translating complex technical systems into intuitive interfaces.

Education

M.P.S. in User Experience Design at Columbus College of Art & Design 2025 - 2027

B.S. in Computer Engineering, Minor in Art & Design at University of Illinois Urbana-Champaign 2016 - 2020

Work Experience

Business Analyst at Connectbase Sep 2024 - Nov 2024

- Analyzed serviceability and quoting APIs from telecommunication suppliers, translating technical constraints into clear product specifications for the Connectbase integration
- Designed and built an intuitive JSON/XML parser tool using React and Javascript to quickly extract supplier API data, reducing manual review time

Founder, Brand & Stationery Designer of Paper Dosai May 2024 - Present

- Founded a wedding stationery and planning business, owning the full creative process from client discovery through final production
- Design semi-custom and custom wedding stationery suites tailored to each couple's aesthetic and story
- Designed a 50+ page wedding planner and a companion 30+ page budgeting spreadsheet, turning a complex, high-stress planning process into a clear, organized client experience

Brand Designer at SereniMind Oct 2024

- Designed a full brand identity system including logo refinement, color palette, and typography, establishing visual consistency across brand touchpoints
- Built a condensed web development component library to bridge brand design and front-end implementation, streamlining designer-developer handoff

Software Engineer and Scrum Master at Viasat Inc. Jun 2021 - Nov 2023

- Developed front and backend components using Javascript/Typescript, React, and Redux for the My Viasat website and mobile application
- Developed Viasat Stream (Disney+) ad and refined the purchase flow, contributing to 10,488 sales
- Created an intuitive workflow board that increased team velocity by 22.8 points over 9 sprints
- Contributed to design and development of the My Viasat Profile page, focused on making personal-info editing simple and error-free
- Bridged designers and developers through design and technical discussions

Skills

Design

Wireframing, Prototyping, Figma, Illustrator, InDesign, XD

Software

Javascript/Typescript, React, Node.js, HTML/CSS, Postman, Jira/Confluence, Github

Research

User Interviewing, Usability Testing, Competitive Analysis, Affinity Diagramming, Journey Mapping, Persona Development
